Mirsarai, Chattogram, Bangladesh.

Enthusiastic frontend developer passionate about transforming ideas into engaging web experiences and seeking to master modern UI technologies while enhancing design skills and contributing to building intuitive, high-performance applications.

Skills:

Technical Skills: HTML5, CSS3, JavaScript (ES6), React, Responsive Design, Git, Firebase, RESTful APIs, MongoDB, ExpressJS.

Interpersonal Skills: Communication, Team Collaboration, Leadership, Time Management.

Projects:

1. Tasty Ride

[LivePage](#)

[Frontend-Code](#) [Backend-Code](#)

Contributed to a team-built responsive food delivery web app using React.js, Express.js, MongoDB, Mongoose, and Tailwind CSS.

- Food delivery web app with real-time order tracking, Stripe payment, and dynamic product management.
- A food delivery app with 4 user roles: **Admin**, **Restaurant**, **Rider**, and **Customer**.
- This includes user authentication, restaurant profiles, an admin dashboard, and a notification system.

My Contribution: Contributed to a food delivery web app using React.js, Tailwind CSS, Express.js, MongoDB, and Firebase. Built authentication (login, register, reset password), dashboard views, restaurant profile, dynamic discount system, and notification feature. Improved UI, fixed bugs, and added Eid countdown timer.

2. Health Rex Store

[LivePage](#)

[Frontend-Code](#) [Backend-Code](#)

Developed an e-commerce platform for healthcare and medical products with seamless online ordering, online payment systems, and advanced search/filtering features.

- Seamless Online Ordering
- Online Payments System
- Advanced Search & Filtering

3. Master Chef

[LivePage](#)

[Frontend-Code](#) [Backend-Code](#)

Created a system for managing restaurant orders, branches, and customer interactions.

- Wide Range of Sports Gear
- Easy Online Purchasing
- Add Products For Sealing
